THE CRAFT OF SEATING
ARC

ARC COLLABORATIVE SETTING

TAILORED FOR THE WORKPLACE TRAVELER

ARC draws inspiration from the Pont d'Arc, an above-water arch in southern France. And just like this geological masterpiece welcomes adventurers into the Ardèche Canyon, ARC welcomes individuals into comfort, collaboration, and conversation, within any architectural environment.

SOFT AND SCULPTURAL

ARC is comfortably plush, yet strong enough for everyday use. The design is available in three distinct models, each geared for different collaborative uses. Open by nature, ARC is tailor-made for today's preferred style of work. Adaptive. Fluid. Inclusive.

CHIC BY DESIGN

ARC just looks good. And you can make it even more attractive when you introduce different colors into the mix. Pick from a variety of textiles. Specify a single color or mix the back and seat. The choice is yours.

STATEMENT OF LINE

ARC With Swivel, Mobility and Pull

ARC With Swivel, Static

ARC With Metal Base

THIS CHAIR'S GOT PULL

Another feature that sets ARC apart is its back pull, which is handsomely sewn into the upholstery. Available on mobile styles only, this leather-looking handle makes it even easier to pull up a chair and connect with colleagues.

ARC LOUNGE SETTING

ABOUT THE DESIGNER
IDI

IDI is a multifaceted design machine, collaborating with architects and top-tier contract furniture dealers to deliver client-specific furnishings for a variety of industries. IDI is headed by the founder of EKO, Dustin Jones (right) with partner Duff Jones (left), and has a long history of making custom products to meet the demands and desires of its clients.
