

THE CRAFT OF SEATING

PANAL

SIMPLE. SOCIAL. SPUR-OF-THE- MOMENT.

"Panal" is Spanish for "honeycomb," the inspiration behind this lively, creative, hexagonal collection. Modular and symmetrical by design, Panal configures into an endless array of touchdown spots and lounge-worthy landscapes. Alone, connected, or alongside other collections, Panal offers endless opportunities for social interaction and the pursuit of new ideas.

PANAL COLLABORATIVE SETTING

FORM. FUNCTION. FACE-TO-FACE

In numerous sizes, Panal elements arrange into casual meeting zones for people to meet and mingle, schedule a meeting or show up unannounced. Varying levels of visual and sound privacy can be achieved, with low-, mid-, and high-backed options available.

MOVE AT A MOMENT'S NOTICE

With casters added, Panal promotes seamless movement and the re-creation of new settings. In corporate or education environments, this means people have more control, greater autonomy, and boundless flexibility.

INSPIRATION TO DRAW FROM

Intended for scribbles, doodles, and casual note-taking, Panal tables and ottomans are available with marker board laminate tops. Marker and eraser holders ensure creative tools are always close at hand.

ABOUT THE DESIGNER IDI

IDI's original concept for Panal was derived from an extensive tour of Morocco in 2015. During tours of ancient Islamic sites, the designers encountered geometric patterns over and over again. Their fascination with geometric art was key in the development of Panal.

Headed by EKO's founder, Dustin Jones, IDI embraces a long history of making custom products to meet the demands and desires of its clients.
