

Pre-Approved Textiles / Soft Collection

THE CRAFT OF SEATING

WHY DO WE RECOMMEND USING PRE-APPROVED TEXTILES?

The truth is, not all fabrics perform well on all products - given individual design lines and upholstery processes. We want to make sure the eko products you specify look their absolute best.

Our Pre-Approved Textiles list was created to do just that - by providing recommendations for textile application based on our experience with textiles on our products.

TESTING FABRICS

We are happy to test fabrics as requested. If you would like to include a fabric in our review process, please send your request to: csr@ekocontract.com

& download our COM process: http://www.ekocontract.com/files/resources/COM_2018_ver_1.pdf

YARDAGE REQUIREMENTS

Yardage requirements are based on the use of 54 in. wide, plain goods.

Fabrics of narrower widths and/or which involve matching repeats will require additional yardage. Please contact eko for specific details at csr@ekocontract.com. Our fabric application default is railroad. Stripes will be applied vertically unless our customer indicates otherwise. In the absence of specific cutting instruction, we will cut fabric at their discretion following these guidelines.

UPHOLSTERY NOTES

Due to the unusual upholstery conditions inherent in the design of Soft, not all seating textiles may be specified.

Pre-approval is required for **ALL** textiles other than those noted in this section.

**Striped and large scale patterns will not be applicable to this product.
